Introduction to KlariVis

The Enterprise Dashboard & Analytics Platform built for bankers, by bankers.

Differentiated Implementation & Support

Onboarding in as little as 90 days

We get our clients up and running quickly, empowering employees in as little as 90 days with self-service access to bank, market, branch, officer, product, customer intelligence to boost productivity, performance and profitability.

Bankers Helping Bankers

We understand your staff may be overwhelmed with other IT projects and priorities. No problem! Our U.S. based implementation team is comprised of former bankers, just like you! And they handle all the heavy lifting and guides you every step of the way.

On-going post-implementation support

Dedicated KlariVis Success Team works as an extension of your team to ensure adoption, best practices and success long after implementation, so you can focus on what matters most: your customers

Banking Expertise

We combine industry and market expertise with a deep knowledge of enterprise data and financial technology to deliver a secure data analytics platform with everything in one place.

Security-First

SOC 2 Type 2 Compliant

KlariVis maintains robust internal controls based upon strict information security policies and procedures developed and implemented to protect our clients' data.

Data Encryption

Data is secured at rest and in transit utilizing industry-recognized encryption practices. Data encryption in transit is the protection of data as it moves from one location to another.

Periodic Penetration Testing

KlariVis leverages regular penetration testing to improve our security posture and remove any vulnerabilities open to attacks or hacking.

Enhanced Microsoft Azure

The KlariVis platform has been developed based upon industry best practices for data security. We leverage Microsoft's best practices for security.

Multi-Factor Authentication

Multiple layers or factors of required user authentication reduces the risk of an intruder gaining access to your critical systems and data.

Single Sign On

Enjoy a convenient and efficient user experience while also improving security by reducing risk and providing centralized control over access to the application.

Client Testimonial
